WHO BENEFITS OF INTERACTIVE VISUAL

A = Structure Team with the organizer
B = The organizer with the guests
C = The guests independently

TO COMMUNICATE

TO COMMUNICATE

Describing your conference structure with a project plan and photos has always been the only means available.

An interactive customizable tool is the effective means of quickly understanding and responding to the needs of your customer.

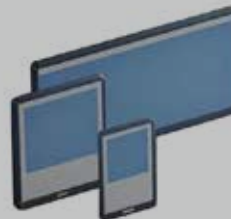

Accessible, viewable on all video and touchscreen supports.

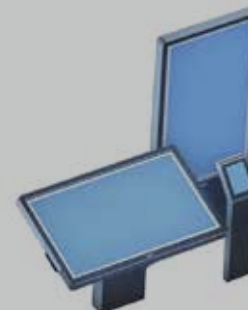

Each device with internet connection allows viewing interactive 3D.

Integration Website

Mobile devices and desktop

Screen Wall e Touch tables

TO WORK

TO WORK

Increase the productivity of the Team

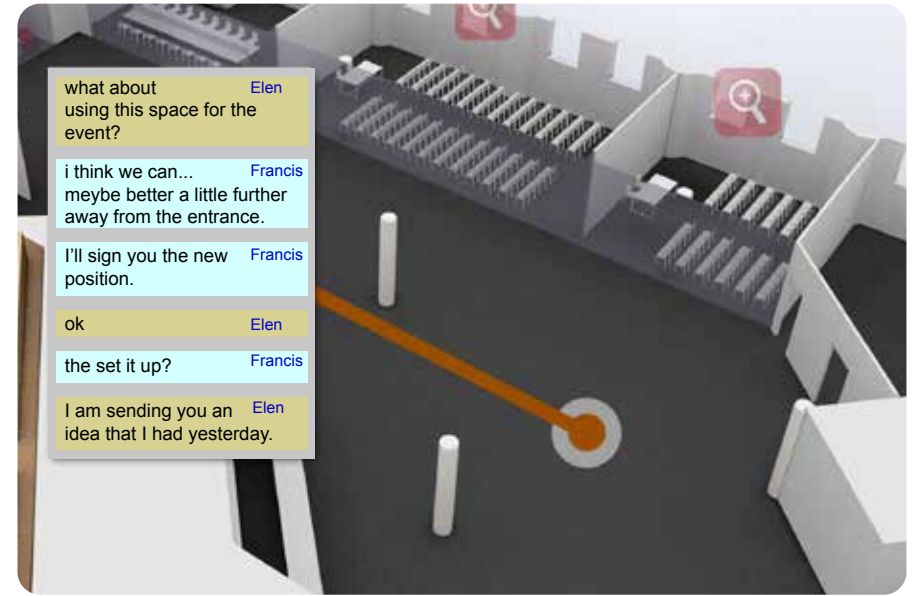

Communication is the determining factor for success, productivity and time optimization.

The administrative part of the Interactive 3D viewer is a powerful tool to achieve this result.

Developed and optimized for the web, the reserved area allows you to navigate in real time in the structure, make comments, notes and record the changes under the name of the event.

Additional tools are available through the activation of the administrative part under password.

- Prepare
- Improve
- Standardize
- Support and spread

The method for planning, operating controlling and reviewing has seen by successful entrepreneurs.

Change is not seen as inconvenience or obligation, but as an opportunity to improve and improve.

TO GROW

TO GROW

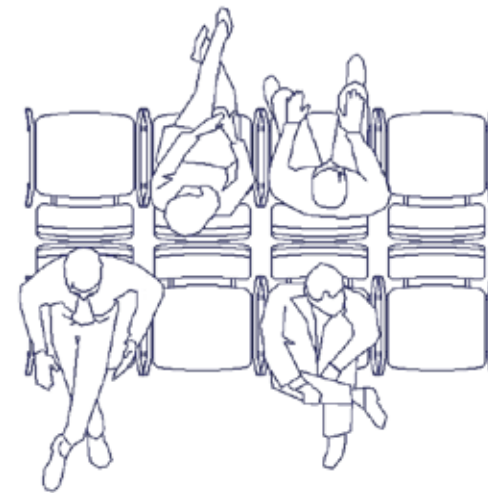

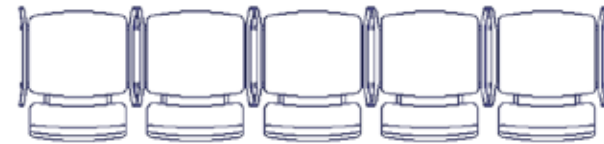

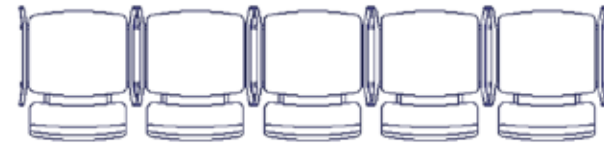

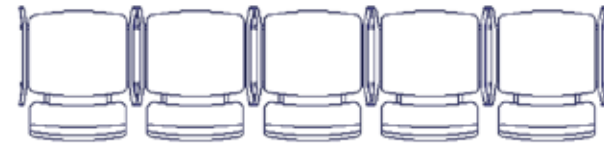

The average user who visits an internet page needs to obtain precise information, and to obtain it in the shortest possible time.

For this reason, understanding how the congress or exhibitions structure is organized and divided is very important. Responding to this need is a priority.

How do you obtain it? Optimizing the information that is present on the official website of the structure. This requires a good arrangement of the elements but also by loading quality contents that allow the correct reading and enhancement of the spaces themselves.

Customization
of the furnishings through
the inclusion of
full-scale elements.

Ease of use

Quick understanding of use, easy and intuitive navigation controls.

Fast

Fast in loading times, optimized for maximum performance.

Versatile

To access the 3D viewer, a dedicated item is inserted in the menu of your official website. It does not require the installation of any plugins.

THE FEATURES

THE FEATURES

EASY TO USE

Intuitive controls, adapted to the device of use.

Dual controls:

- 1) From the drop-down menu - You can navigate the entire structure and open the various sections.
- 2) From the 3D Model - It is possible to navigate in full screen with special controls placed near the rooms.

VERSATILITY

- Synchronization with multiple devices
- Big screen projection
- Remote sharing

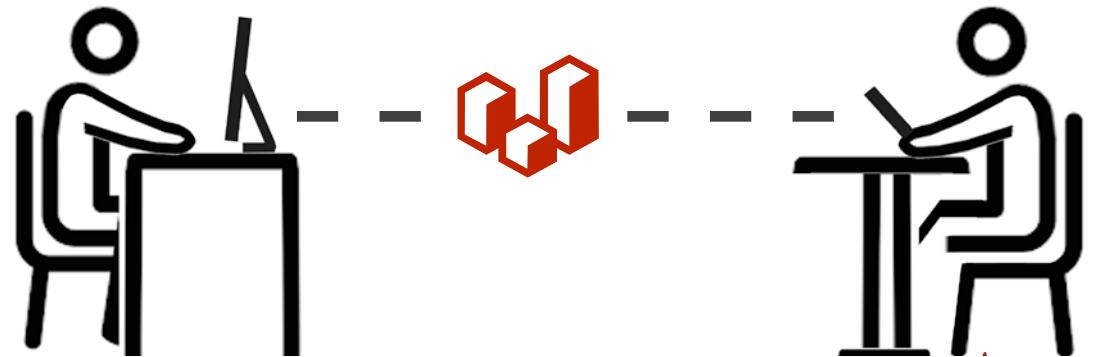

- Direct link to the presentation by voice from the menu
- Share the interactive presentation online via the property's official website.
- Synchronize the 3D model remotely.

Real-time synchronization

The visualization can be performed by activating the real-time synchronization of the view with the remote user.

It does not require the installation of programs for sharing screens.

VIRTUAL TOUR

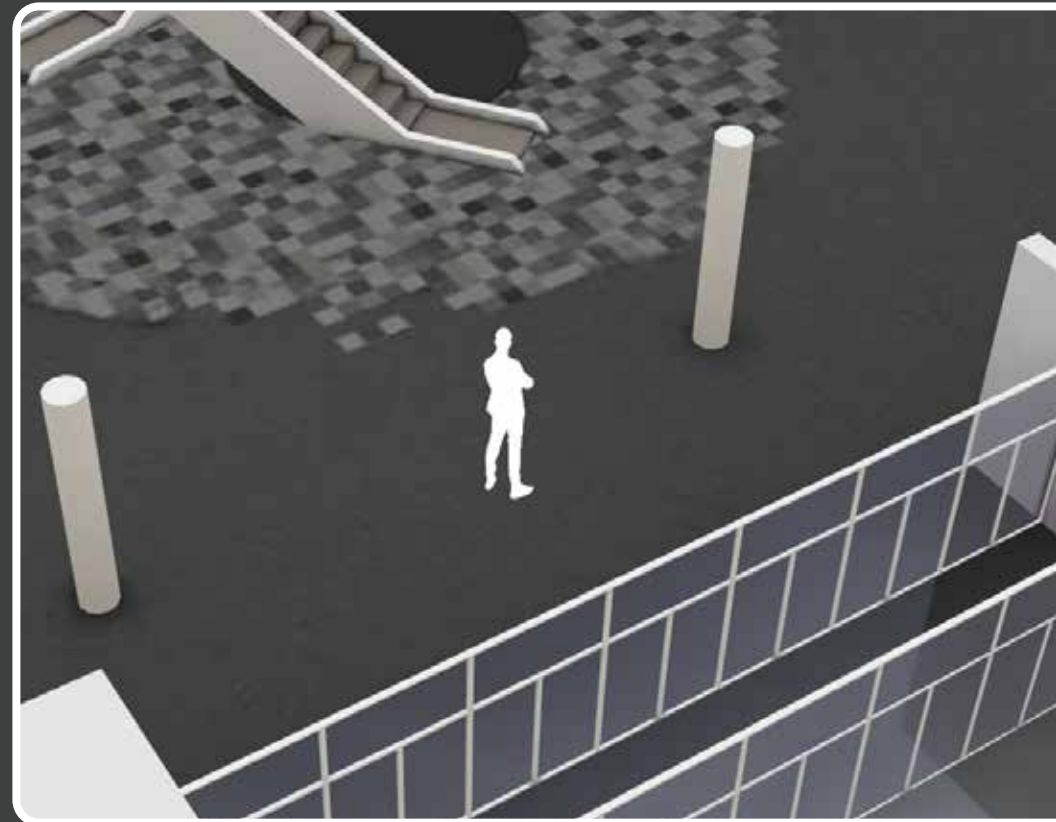

VIRTUAL TOUR

The Virtual Tour is a solution with a strong visual and emotional impact to promote your structure.

Users who browse the Virtual Tour become the protagonists of an experience that highlights the characteristics of your business.

People explore, visit the structure, virtually walk through in the interior spaces, view the products and information by means of the drop-down menu and dedicated windows.

With the creation of the Virtual Tour it is possible to make the beauty and peculiarities of the spaces intended for events come alive, arousing considerable interest from users.

Why maintenance is important

Every month new models of smartphones, electronic devices and operating systems are updated to new versions and browsers for surfing the internet undergo continuous updates. So that the old platforms are gradually abandoned and no longer updated, giving way to new ones. For this reason, updating the software is very important for maintaining high performance and reducing the times of use.

In addition, in order to make the browsing experience more enjoyable, new display systems are constantly introduced that improve both the graphic interface and their management.
